Buttering system WBS-600

NEW !

**The
buttering system
for the
Sandwich production**

Buttering system WBS-600

WBS-600

- *The solution for the buttering on a lot of sandwich products
- * The buttering system for the industrial production
- * The products are covered by a contact method flatly
- * The buttering can be carried out with different masses (Ex. mixed butter, mayonnaise mix, sandwich spread)
- * A continuous product run is carried out
- * The height of the spread head is individually adjustable on different product heights - automatic compensation at different product heights of (+/- 5 mm.)
- * The product feed could be made by manual or by an automatic product take-over of a conveyor belt
- * direct regulation of the working speed by potentiometers
- * The layer thickness is also adjustable - Attitude of the layer thickness by handwheel and scale
- * mobile unit by swivel castors - through this the machine can be used flexibly in different production areas
- * easy dismantling of the most important machine parts for the fast and effective cleaning (Dismantling without tool)

Technical Details:

Length: 1300mm
Width: 1200mm
Height: 1850mm

Weight: app.250 kg

max. working width 600 mm
min. product height: 5 mm
max. product height: 40 mm

Electr. power: 230/400V
50 Hz
3 Ph

Power consumption: 1,5 kW
